

**Amendment to the Specification:**

Please add the following paragraph immediately after paragraph [06]

Fig. 1B is a detailed perspective view of a preferred embodiment.

Please amend the paragraph at page 2, lines 4-9 as follows.

Features of the present embodiment, depicted in Fig. 1A and 1B include: Dual laser sighting system 12 that demonstrates the focal point by merging the two laser points. At the focal point, there is a useful (for automobile repair) measurement spot size of 0.5 inch (13mm) at 8 inches (200mm). The D:S information is described below so that customers will have an idea of the measurement spot when not at focal point.
